NAME

    mtx-fonts

SYNOPSIS

    mtxrun --script fonts [*OPTIONS ...* **] [** *FILENAMES* **]**

DESCRIPTION

    ConTeXt Font Database Management

OPTIONS

    --convert

        save open type font in raw table

    --unpack

        save a tma file in a more readable format

    --reload

        generate new font database (use --force when in doubt)

    --reload

        --simple:generate luatex-fonts-names.lua (not for context!)

    --list   --name: list installed fonts, filter by name [--pattern]

    --list   --spec: list installed fonts, filter by spec [--filter]

    --list   --file: list installed fonts, filter by file [--pattern]

    --pattern=str

        filter files using pattern

    --filter=list

        key-value pairs

    --all   show all found instances (combined with other flags)

    --info   give more details

    --trackers=list

        enable trackers

    --statistics

        some info about the database

    --names

        use name instead of unicodes

    --cache=str

        use specific cache (otl or otf)
